Who is this package for?

This special 6-month naturopathic treatment package is for patients who have either been diagnosed with leaky gut syndrome, are experiencing unexplained symptoms that may be caused by leaky gut, and seeking natural remedies and solutions for digestive health.

The aims of this Leaky Gut and Digestive Solutions Package are to:

1) Determine whether your symptoms have their origins in leaky gut through carefully selected tests for food sensitivities.
2) Design a natural remedy plan that will reverse your symptoms and restore your quality of life.
3) Provide you with all the tools you need to implement your remedy plan easily.
4) Design a long-term lifestyle and dietary regime to make sure your symptoms don’t return, and to help you stay healthy after you have recovered.

What is leaky gut?

Leaky gut (also known as intestinal permeability) exists when the cells lining the small intestine are not as healthy as they ought to be and are allowing undigested food, bacteria and other substances to leak through the intestinal lining into the underlying tissue.

In an optimal state, only nutrients and water are allowed through the intestinal lining. When leaky gut occurs, the immune system reacts as a protection mechanism, leading to inflammation that can spread from the digestion throughout the body.

The result of leaky gut is that food sensitivities (non-allergic immune responses to food) develop, which can cause a range of symptoms in your body.

If you continue to ingest the foods your body is rejecting, you can cause extreme damage to your intestinal lining. When that happens, your symptoms can become debilitating, and your health can feel like it has spun completely out of control.

Extensive research has shown that leaky gut is caused by stress, pesticide exposure (from non-organic foods), and gluten (the protein in wheat, barley, spelt and rye), as well as from antibiotics, antacids and other medications.

Unfortunately, very few mainstream medical practitioners will test you for food sensitivities or investigate whether you actually have leaky gut.

Also, as so many of the symptoms don't “look” like digestive issues, they might not even think to look there. Instead, they will usually prescribe medicine (or surgery) to address the symptoms. But without healing the underlying cause, these symptoms are almost certain to persist and even increase.
What makes Dr. Doni’s approach to Leaky Gut and Digestive Issues different?

As a naturopathic doctor, Dr. Doni looks at your whole body to determine the underlying cause of your leaky gut problems.

She knows leaky gut is not a “black or white” condition, but a spectrum; in other words, patients can have mild, moderate or severe symptoms. Thus, it is important to work with someone who can not only diagnose the exact nature of your condition and know how to treat it appropriately, but also provide you with the tools and resources to enable you to take back your health.

After determining what is causing your leaky gut through carefully selected tests, Dr. Doni will work with you to address your problem through diet, nutrients and herbs, so that your body will be able to heal your intestinal lining.

Recovery can take anywhere from three months to two years depending on the severity of your condition and the approaches used to heal it.

From experience, Dr. Doni knows that those who faithfully follow the COMPLETE healing protocol are the ones who are most likely to recover completely and permanently, without the risk of becoming a slave to prescription medication.

For all these reasons, Dr. Doni has developed this naturopathic Leaky Gut and Digestive Solutions Package.

Symptoms of leaky gut you might be experiencing

Many people suffer for years with leaky gut without knowing this is what they have.

The reason doctors fail to diagnose it is that there are over 200 symptoms that might have their origins in leaky gut. That is why it is better to think of leaky gut as a syndrome, rather than a “condition”.

While everyone is different, here are some of the most frequent symptoms of leaky gut syndrome:

1) Digestive issues; irritable bowel syndrome (IBS)
   • Recurring skin rashes or skin allergies
   • Headaches; migraines
   • Achy joints; fibromyalgia
   • Chronic fatigue
   • Mood issues, such as anxiety, depression, or irritability
   • Unexplained weight gain
   • Insulin production issues; insulin resistance, PCOS, diabetes
   • Thyroid issues and Hashimoto’s thyroiditis
   • Fatty liver disease
   • Autoimmune conditions, such as lupus, rheumatoid arthritis, and M.S.
   • Many others
As you can see, many of the symptoms SEEM to be unrelated to the stomach. This is why so many people suffering from leaky gut reach a point of desperation. They feel like they are “falling apart”, but nothing their doctors give them makes them feel any better.

They can sometimes feel like their doctors think it's “all in their heads”, when actually the underlying issue lies in their intestinal lining.

Why Is a Treatment ‘Package’ better than ‘a la Carte’?

This package costs significantly less than the same treatment ‘a la carte’. What’s more, patients who commit to a 6-month package like this tend to stick to their health regime more faithfully, thus increasing their chances for better results.

What is included in this Leaky Gut and Digestive Solutions treatment package?

TESTING

In this package, you will take the following tests* to determine your health needs:

- IgG and IgA food sensitivities panel for 96 foods

Additionally, you may also need to do a stool panel and/or a panel to assess for cortisol, adrenaline and neurotransmitter levels, either through our offices or independently. Some additional blood work may also be required (example: metabolic panel, thyroid, etc.), which can be done either through your doctor or through Dr. Doni’s office.

*If you have recently done any of these tests, you will not need to do them again. Simply ask your doctor to send the test results to Dr. Doni’s office. The price of your package will be adjusted accordingly.
